

Daniel Machado Barbosa Delgado

Full-Stack Software Engineer | .NET | C# | Angular | React | Artificial Intelligence | SQL Server | REST APIs

+55 32 99173-3863 | dev.danielmachado@gmail.com | [linkedin.com/in/daniel-machado-47326b132](https://www.linkedin.com/in/daniel-machado-47326b132)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with over 5 years of experience, specialized in .NET and frontend frameworks such as Angular and React. Proven track record of boosting application performance and leading high-impact projects, delivering significant cost savings and real gains in operational efficiency. Solid experience in designing and delivering scalable, high-availability applications, modernizing legacy systems, and leading CI/CD automation initiatives. I apply Clean Code, SOLID, and automated testing to build secure and maintainable solutions, collaborating with cross-functional teams to achieve exceptional results in diverse technical environments.

PROFESSIONAL EXPERIENCE

SERGET — Software Engineer

Mar 2023 – Present | Full-time · Remote

- Modernized critical legacy systems for radar management and urban mobility, migrating modules from .NET Framework to .NET 6 with C#, Angular, TypeScript, and SQL Server in a high-availability environment.
- Designed a resilient architecture with messaging (RabbitMQ), distributed cache (Redis), workers, and asynchronous processing (Background Services), eliminating bottlenecks in the processing of thousands of records daily.
- Optimized complex SQL queries and reports, reducing execution time by up to 300% in operations that process millions of records.
- Applied Clean Code and SOLID principles and led CI/CD automation (Git Flow, Jenkins, pipelines), increasing delivery speed by 40% and reducing downtime by 99.9%.
- Developed department- and contract-based access control for hundreds of users and improved logging and monitoring, reducing problem diagnosis time by up to 50%.
- **Skills:** C#, .Net Core, Rest API, Angular, SingleSPA, Webpack, Jenkins, Git, Bitbucket, RabbitMQ, Redis, IIS, Microsoft Server, SQL Server, Microservices, Scrum, KanBan, Unit Test, xUnit, Jasmine, Jest, Integration Tests, ChatGPT, Cursor, GenAI.

CS Global IT — Software Engineer

Dec 2024 – Jul 2025 | Freelance · Remote

- Acted as back-end technical lead on critical enterprise solutions for GOL Airlines, developing applications in .NET 8 integrated with Oracle, Azure DevOps, and internal systems.
- Modeled and developed REST APIs with .NET 8, C#, Entity Framework Core, Dapper, and Oracle PL/SQL, ensuring high reliability in the integration between multiple corporate systems.
- Implemented complex business rules and transactional flows consumed by Angular applications, reducing rework and inconsistencies in critical integrations.
- Applied Clean Architecture, SOLID, automated testing, and technical documentation, increasing test coverage and delivery quality in an enterprise environment.
- **Skills:** C#, .Net Core, Python, Rest API, Angular, Azure, Azure Functions, Oracle Cloud Infrastructure, Oracle Cloud Object Storage, Git, GitHub, RabbitMQ, SonarCloud, Oracle, PL/SQL, Microservices, Scrum, KanBan, Jira, Unit Test, xUnit, Jasmine, Jest, Integration Tests, Cursor, ChatGPT, GenAI.

ATIVA Gerenciamento de Recursos — Software Engineer

Aug 2021 – Mar 2023 | Full-time · Remote

- Developed bots, web crawlers, and third-party integrations, enabling record annual data acquisition and reducing manual tasks by up to 70%.
- Developed and evolved scalable and secure web APIs and applications for the legal sector with C#, .NET, Angular, and TypeScript.
- Built responsive and intuitive interfaces in Angular, applying Clean Code and object-oriented design to ensure maintainability and scalability.
- Implemented high-performance solutions within an agile team, improving performance and fixing critical security vulnerabilities.
- **Skills:** C#, .Net Core, Rest API, Angular, TypeScript, Microfrontend, SingleSPA, Webpack, Git, Bitbucket, RabbitMQ, SonarCloud, IIS, Microsoft Server, SQL Server, Microservices, Scrum, KanBan, Unit Test, xUnit, Jasmine, Jest, Integration Tests, Selenium.

PROJECTS

Case Updates Bot — Creator and maintainer

Feb 2026 – Present | Automated system for sending case updates to law firms

- Architected and deployed an automated system that collects and organizes information on legal cases and replies to a law firm's clients about case updates via WhatsApp.
- Used AI-assisted development (Cursor AI, MCP, Agents) to deliver features 3x faster (2-3 days vs. 1-2 weeks); implemented a .NET 8 back-end, background processing, Docker containers, and CI/CD pipelines, minimizing infrastructure and processing costs.

EDUCATION

- Bachelor's Degree in Computer Science – Universidade Federal de Juiz de Fora

LANGUAGES

- **Portuguese** — Native
- **English** — Advanced (reading, writing, and conversation)

TECHNICAL SKILLS

Artificial Intelligence: Integration with LLM APIs, RAG (Retrieval-Augmented Generation), Prompt Engineering, Harness, AI automation, MCPs, Cursor, Claude Code.

Languages and Frameworks: C#, .NET, .NET Core, ASP.NET Core, ASP.NET MVC, Angular, React, Vue.js, TypeScript, JavaScript, SQL, PL/SQL, Python, Java, Spring Boot, React Native, Entity Framework Core, Dapper, RxJS, REST/RESTful APIs, Background Services, Workers, JWT, OAuth.

Data and Infrastructure: SQL Server, Oracle, PostgreSQL, MySQL, MongoDB, relational modeling, stored procedures, query tuning, RabbitMQ, Redis, microservices, event-driven architecture, Clean Architecture, DDD, CQRS, SOLID, Design Patterns, asynchronous processing, concurrency, parallelism, resilience, and high availability.

Cloud and DevOps: Git, GitHub, GitLab, Bitbucket, Azure, Azure DevOps, Oracle Cloud Infrastructure, CI/CD, Jenkins, pipelines, Docker, Linux, IIS, staging and production environments.

Testing and Practices: xUnit, NUnit, Moq, Jasmine, Jest, Selenium, Playwright, unit and integration testing, TDD, Clean Code, code review, refactoring, Scrum, Kanban, agile methodologies.
