

DANIEL MACHADO BARBOSA DELGADO

FULL STACK DEVELOPER

dev.danielmachado@gmail.com , [+55 32 99173-3863](tel:+5532991733863) , [linkedin.com/in/daniel-machado-47326b132](https://www.linkedin.com/in/daniel-machado-47326b132)

SUMMARY

Full Stack Developer with 5+ years of experience in software development, critical enterprise systems, and legacy system modernization, working with C#, .NET, .NET Core, .NET 6, .NET 7, .NET 8, ASP.NET Core, Angular, TypeScript, JavaScript, SQL Server, Oracle, PL/SQL, and REST APIs. Solid experience in enterprise environments across urban mobility, aviation, and legal tech sectors, delivering projects with high data volume, complex business rules, system integrations, performance optimization, security, scalability, and ongoing maintenance. Hands-on expertise in Clean Architecture, SOLID, DDD, microservices, messaging with RabbitMQ, distributed caching with Redis, Entity Framework Core, Dapper, Docker, Git, Azure DevOps, CI/CD, automated testing, and legacy code refactoring. Problem-solving oriented profile focused on technical quality and delivering business value.

EXPERIENCE

Full Stack Developer

March 2023 – Present

SERGET

Remote

- Designed, developed, and maintained scalable REST APIs with well-defined contracts, JWT authentication, profile-based authorization, centralized error handling, and robust security measures.
- Modernized critical modules for a resilient architecture by integrating RabbitMQ for messaging, Redis for distributed caching, queues, workers, and retry mechanisms to support high-volume workflows.
- Implemented asynchronous processing and Background Services to reduce bottlenecks in high-volume routines, improving operational stability.
- Optimized queries to significantly reduce response times for reports and operational screens, enhancing overall performance.
- Contributed to the modernization of legacy radar and urban mobility management systems by migrating .NET Framework modules to .NET 6, using C#, Angular, TypeScript, and SQL Server, and advancing OCR-based AI inspection of traffic infractions to cut manual validation costs and time.

Backend Developer

January 2025 – August 2025

CS GLOBAL IT

Remote

- Led backend development for enterprise aviation project, delivering .NET 8 solutions integrated with Oracle, Azure DevOps, and internal systems for GOL Airlines as the technical owner of back-end components.
- Designed and implemented RESTful APIs using .NET 8, C#, EnPTY Framework Core, Dapper, and Oracle PL/SQL, ensuring reliability, traceability, and seamless cross-system integration.
- Built intelligent document processing pipelines leveraging OCR and AI to extract, read, and validate financial data from PDFs and images, with structured document chunking and segmentation to optimize analysis and semi-structured data validation.

Full Stack Developer

August 2021 – March 2023

ATIVA G.R.

Remote

- Developed web applications, REST APIs, and integrations using C#, .NET, ASP.NET Core, Angular, TypeScript, and SQL Server.
- Delivered end-to-end full-stack solutions from database modeling to user interface, ensuring alignment between business rules, APIs, and front-end screens.
- Implemented automation with web crawlers and RPA using Selenium, Playwright, and .NET to streamline routines and reduce repetitive tasks for lawyers and developers.
- Participated in Agile deliveries (Scrum), requirements elicitation, bug fixes, and evolutionary support.

EDUCATION

Universidade Federal de Juiz de Fora (UFJF)

Bachelor's Degree in Computer Science

PROJECTS

Legal Process Update Bot

February 2026 – Present

Creator & Maintainer

- Architected and deployed a Chatbot system that collects and organizes judicial case data and, using automation and AI, responds to law firm clients regarding case updates.
- Leveraged AI-assisted development (Cursor AI, MCP, Agents) to deliver features 3x faster (2–3 days vs. 1–2 weeks); implemented .NET 8 back-end, background processes, Docker containers, and CI/CD pipelines, minimizing infrastructure costs.

SKILLS

Technical Skills:	C#, .NET, .NET Core, ASP.NET Core, ASP.NET MVC, Angular, TypeScript, JavaScript, Python, SQL, PL/SQL, Entity Framework Core, Dapper, RxJS, REST APIs, RESTful APIs, JWT, OAuth, Background Services, Workers, Asynchronous Processing, Concurrency, Parallelism, Microservices, Event-Driven Architecture, RabbitMQ, Redis, Clean Architecture, Domain-Driven Design (DDD), CQRS, SOLID Principles, Design Patterns, Clean Code, Refactoring, High Availability, Resilience, SQL Server, Oracle, PostgreSQL, MySQL, Relational Database Modeling, Stored Procedures, Query Tuning, Git, GitHub, GitLab, Azure DevOps, CI/CD, Pipelines, Docker, Linux, IIS, Staging & Production Environments, xUnit, NUnit, Moq, Unit Testing, Integration Testing, Test-Driven Development (TDD), Code Review, Scrum, Kanban, Agile Methodologies, Playwright, Selenium, RPA, Web Crawlers, OpenAI API Integration, Cursor AI, MCP, Claude Code, Spec-Driven Development, Harness
Languages:	English, Portuguese
